BAKER CREEK HEIRLOOM SEEDS
MANSFIELD * MISSOURI 65704

CAT# OG106 LOT# 9154
MIN 200 SEEDS 0.369 \$2.75 (15)
PACKED FOR 2024 SELL BY 12/31/24

(*Eruca sativa*)

ARUGULA

Delicious spicy-flavored salad green native to the Mediterranean. Spicy, peppery flavor that is a rage in salads! One of our most popular greens. A very easy to grow, early maturing, cold tolerant green.

PLANTING INSTRUCTIONS

Succession-plant for continued harvest. Summer plantings can be located in part shade to avoid bolting and for better flavor.

CLASSIC ARTISTIC MIX BACHELOR'S BUTTON

Annual. Cheery, mostly bicolor Bachelor Buttons, in sky blue, royal blue, burgundy, rose, pink and white.

PLANTING INSTRUCTIONS

Sow in place in fall or winter (mild winter climates) or early spring where winters are severe. Space plants 8-12 inches. Removing spent blooms prolongs the blooming season. Self-sows freely.

(Ocimum americanum)

LEMON BASIL

Wonderful, light yet intense lemony fragrance and taste. A real culinary delight!

PLANTING INSTRUCTIONS

Annual. May be sown in place in long-summer areas, or started indoors and set out after last-frost date of spring. Set out seedlings at any size, when warm conditions have arrived. Keeping flower spikes picked off in early summer will allow the plants to grow more quickly.

BEETS
GOLDEN

BAKER CREEK HEIRLOOM SEEDS
MANSFIELD * MISSOURI 65704

(Beta vulgaris)

GOLDEN BEETS

Dates back to before the 1820s. A beautiful yellow-fleshed heirloom beet that won't bleed like red beets, with a more mellow flavor.

Excellent greens, too!

PLANTING INSTRUCTIONS

Amend planting site with well-rotted compost, work soil deeply, and remove rocks. Sow 3-4 weeks before last frost. Thin early for best results. Requires neutral to slightly alkaline soil.

MANSFIELD * MISSOURI 65704

CAT# BM117 LOT# 8343FB
MIN 6 SEEDS \$6.02 (14)
PACKED FOR 2023 SELL BY 12/31/23

(*Memordica charantia*)
'JYUNPAKU' OKINAWAN PURE WHITE BITTER MELON
A natural marvel, the purest white bitter melon variety we know, reminds us of the elegant white pearls found off the coast of Okinawa. The most stunning edible ornamental, this extra large, mild Japanese bitter melon bears pearly white, mellow flavored fruit. Refined, less bitter flavor that is still quite nutritionally potent and health promoting.

PLANTING INSTRUCTIONS

Revels in heat and humidity. Grow up a trellis or fence. Soaking seeds overnight and nicking or splitting the tough outer seed coat may improve germination.

(Melissa officinalis Limoncello)

LIMONGELLO LEMON BALM

Perennial, zones 4-9. Much stronger lemon scent than any other lemon balm variety! Crawling habit, spills from hanging baskets and pots, or excellent ground cover. Delicious tea plant. Small white blooms appear in summer. Height 6-12 inches, 20-24 inches wide.

PLANTING INSTRUCTIONS

Start indoors, covering seeds very lightly and keeping moist until sprouts appear. Set outside after last frost or direct sow in the garden two weeks before last frost. Cutting back after flowering encourages reblooming.

(Capsicum annuum)

ETIUDA PEPPER

A tasty Polish commercial variety! Sugary sweet when ripe. Blocky, thick-walled orange fruit is crisp, and juicy, reaching 1/2 lb!

PLANTING INSTRUCTIONS

Start indoors in bright light 8-12 weeks before last frost date. Heat mat helps to warm soil and speed germination. Peppers often appreciate a bit of afternoon shade during the hottest summer weather.

NADAPENO PEPPER

Love the flavor and crunch of jalapeno, but can't take the heat? This truly heatless jalapeno is perfect for those with sensitivity or aversion to the heat of traditional jalapeno peppers. Great for pickling, stuffing, poppers and salsa. This variety is very early and prolific!

PLANTING INSTRUCTIONS

Start indoors in bright light 8-12 weeks before last frost date. Heat mat helps to warm soil and speed germination. Peppers often appreciate a bit of afternoon shade during the hottest summer weather.

(*Scabiosa atropurpurea*)

FORMULA MIX SCABIOSA

90-100 days. Annual. A brilliant, vibrant mix of strong-stemmed scabiosa, perfect for cutting and floral design, also ideal for landscaping. Plants reach 2-3 feet tall. 1.5-2.5 inch blooms come in a wild range of colors.

PLANTING INSTRUCTIONS

Sow indoors 4-6 weeks before last frost. Barely cover, as light aids germination. Cold stratification for 2 weeks will improve germination. Plantings every 2-3 weeks until midsummer provide the best blooms. May require support.

JIROMARU SPINACH

A productive and delicious spinach variety that is a beloved staple in Japan. The distinctive arrow-shaped leaves are a familiar sight at Japanese markets. It is believed that a western variety of spinach was crossed with a local native type many generations ago.

PLANTING INSTRUCTIONS

Direct sow in late winter or early spring, as soon as soil can be worked. Likes rich, well-drained soil with ample moisture. Long summer days or hot conditions cause plants to bolt.
