MOFGA CERTIFIED ORGANIC

## Bouquet Dill OG

55 days to maturity  
2 gram packet; about 1000 seeds

Annual. Bouquet is superior for dill weed production, as its abundant leaves are sweet and refined.

Attractive to pollinators.  
Name derived from the Norse *dilla*, meaning 'to lull,' as the plant is said to have soothing properties.

Direct seed in early spring through mid summer, planting seeds  $\frac{1}{4}$ " deep,  $\frac{1}{2}$ " apart in rows that are 6" apart. Make successive plantings every 2-3 weeks throughout the season for a continuous supply.

Self sows. Foliage should be harvested before seed stalks mature.

Exceeds federal  
germination standard of:

60%

## Umpqua Broccoli OG

90 days to maturity  
25 seeds

Boasting handsome uniform dark-green 5–6" heads, Umpqua is a great producer of abundant side shoots over a long harvest window. An ideal home-garden variety for the fall.

Start broccoli indoors March–May for setting out May–July, or direct seed in early June for a fall crop. Space plants 18" apart and keep them well-watered.

Use floating row cover to protect tender young seedlings from flea beetles. Remove cover once plants reach half growth.

Exceeds federal  
germination standard of:

75%

## Matchbox Hot Pepper OG

75 days to maturity

0.2 gram packet; about 30 seeds

Upright 2" long peppers ripen to deep scarlet on prolific squat plants. Bears well in challenging conditions. Can be potted and overwintered. Plenty hot at 30,000-50,000 Scovilles.

Start indoors in March or April. Peppers germinate best at temperatures between 68–95°. Set out plants in June, spacing 18" apart. Will not tolerate frost, dislikes wind, and will not set fruit in extreme conditions. Black plastic mulch recommended.

Warm nighttime temperatures stimulate maximum development of capsaicins and increase pungency levels, expressed in Scoville units.

Exceeds federal germination standard of:

55%

## 3 Root Grex Beet OG

54 days to maturity

1/8 oz packet; sows 20 feet

An interbreeding mix of three heirlooms with three distinct colors: a pinkish red with some orange in it, a bright gold, and a beautiful iridescent orange. Elongated roots can be as much as 3½" across and 7–8" long. Also produces copious greens.

Beets are hardy and can be sown as soon as ground can be worked, once soil temperatures reach 40°.

Sow seeds ½" deep in rows 12–18" apart. For full-sized beets, you must thin to at least 3" apart. Baby-beet thinnings cooked with tops are a Yankee delight!

Exceeds federal germination standard of:

65%

MOFGA CERTIFIED ORGANIC

**Siegfried Frost Leek OG**

120 days to maturity  
1/16 oz packet, about 400 seeds

With stalks growing as much as 4" across, this leek often withstands the rigors of winter to offer a delectable spring treat.

Start indoors in late February and transplant out in spring as soon as the ground can be worked. Set 6-12" apart in trenches or well-dug beds with lots of organic matter. Avoid transplanting next to grass strips; slugs love to dine on tiny allium seedlings.

Leeks will hold in the field until November, but brought into the root cellar they survive almost all winter if heeled into soil.

## Summer Lettuce Blend

42 days to maturity  
1 gram packet; sows 13 feet

A special selection of red, green and bronze lettuce varieties that most years will stand well into July without bolting. At least a half-dozen different lettuces, all suitable for cut-and-come-again culture. Our best-selling lettuce mix.

Direct seed as soon as ground can be worked and repeat every 2 weeks for continuous supply. Sow  $\frac{1}{8}$ " deep, 4-6 seeds per inch, in rows 4-8" apart.

Harvest when leaves reach desired size, taking care to leave growing tips intact for effective regeneration.

## Jewel Mix Nasturtium

42 days to maturity  
25 seeds

Annual. Early bushy free-flowering blend of orange, yellow, red and gold. Edible flowers with spicy sweet fragrance lend a peppery-sweet taste to salads, with each color adding contrast and subtle variations in flavor. Round leaves also edible. 16" tall.

Direct seed after last frost, 1" deep, spacing 12" apart. Cover seed well. Germinates in 7-10 days at 65°.

Blooms keep coming if cut, needs moisture and cool temperatures for optimal blooming. Intolerant of frost. Avoid excess nitrogen, likes full sun.

## Torch Tithonia

120 days to maturity  
20 seeds

Annual. Also known as Mexican Sunflower. Attract butterflies and bumblebees with these 6' tall floriferous beauties. Smooth dark green leaves with dressy scarlet blooms that often exceed 4" across and continue over a long season.

Sow outdoors after danger of frost, once soil has warmed to 70–85°, or start indoors 6 weeks before last frost date. Seeds require light for germination. Thin to 18" between plants.

Heat-loving plant closely related to the zinnia. Tithonia sulks in the cold so don't bring it out too soon.

## **Black Zucchini**

50 days to maturity

1/16 oz packet; sows about 3 hills

Superior flavor and standard yields of dark green firm fruits with tender flesh and small seed cavities, best picked around 6". Open plant habit makes picking easy.

Sow in hills 4' apart, 4 seeds/hill. Thin to 2-3 best plants. Use wire hoops and row cover to keep out cucumber beetles. Make succession plantings every 2-3 weeks to ensure harvest through the entire season.

For best flavor, pick when fruits are small. Leaving oversized squash on the vine shuts down production.
